

Laydown Skid

Pump unit and sample & recycle unit can easily be integrated in the various laydown skids

For our Helicopter Refuelling Systems we have a wide range of Laydown Skids for both transportable tanks and static storage tanks. The laydown skid range is one or two storage tanks or from a single transportable tank and up to 8 transportable tanks. A heavy duty bumper will in addition to tank support frame function as support for the deluge system.
