# Mantis ROV operated Saw

**Over the 10 past years delivered a range of subsea cutters for different subsea removal projects**

Imenco's cutters utilize hard metal tipped blades of varying diameters, dependant on object to be cut. By fine control of blade movement, these cutters are very efficient and feedback from the users are very positive.

Imenco has a very qualified engineering staff being able to "tailor" cutters almost for any cutting purpose, whether it is chains, piping or structural objects. We make cutters to fit your requirements!

- Chain cutting
- Pipe cutting
- Bolt cutting
- Other structures
