The story of Imenco

Imenco Group is a dynamic collective of companies, dedicated to delivering cutting edge technological solutions for the

International Subsea, Energy and Renewables industries. With a strong global presence in regions like Scotland, Norway, Brazil, Chile, and the USA, we offer a comprehensive range of products and services tailored to your unique needs.

With over 40 years of experience in subsea, offshore, renewables, marine, and defence markets, we are your trusted partner in navigating challenging environments.

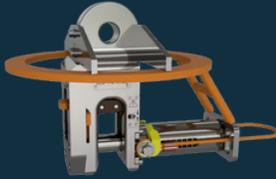

At Imenco, we are committed to excellence and delivering environmentally friendly, sustainable and technically innovative solutions, ensuring safer and more efficient operations worldwide. We pride ourselves on collaboration, listening to your specific challenges, and leveraging our technical expertise to deliver solutions that others cannot or will not.

Choosing a partnership with Imenco, introduces Smart Solutions and technology that enhance both performance and cost efficiency.

Our belief, and experience, is that this is a formula that drives success.

Subsea Lifting & Handling

ROV Operated Shackle

- Remote operation without diver intervention. 6.5Te to 150Te

Hydraulic Shackle

- Function from topside via hoses or via ROV hot stab

Acoustic Shackle

- Topside operation up to 3000m, >3000m ROV operation

Eagle Latch

- Designed for ROV assisted thruster replacement

Snapper Weak Link

- Dual modes: safe lifting or controlled weak-link release

Combined Weak Link

- Utilizes a shear pin with a predetermined breaking load

S-Hook

- Removes requirement for sling installation by ROV

ROV Bullet & Latch

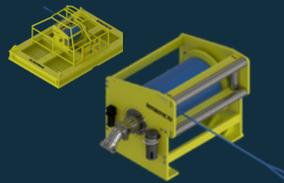

- Secure ROV deployment and recovery without umbilical strain. 0.5Te to 12 Te

Load Transfer Plate

- Load Transfer Plate is for mid water weight transfers from ship to ship

Subsea Winch & Guidebase

- ROV-operable 20Te subsea winch with gravity base

Power Slips Lifter

- Lifts drill collar slips in and out of rotary table

Wire Tention System

- Ensures constant tension on guide wire ropes, lifting equipment and marine risers

Innovative Solutions,
Infinite possibilities

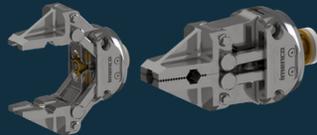

ROV Tooling

3 & 4 Finger Jaws

- Made to fit Titan II/III/IV and Orion manipulators

Parallel Claw

- Made for the Schilling T4 Arm and Orion Arms with adaptor plate

ROV Switch

- Designed for use with standard ball valve or can be delivered with several multi way combinations

Fishtail with Flexible Joint

- Standard handle for ROV-operated tooling and valves

ROV Tensioning Tool

- Dual-function tool for bolt tensioning and nut spinning
 - Handles high loads up to 1500 kN

Flange Bolt Cutter

- ROV-operable tool for cutting subsea flange bolts

Stinger Drilling Tool

- Hydraulically powered & operated by work-class ROVs

Mantis ROV Operated Saw

- Designed for subsea cutting of chains, pipes, and bolts

Fluid Sampling Skid

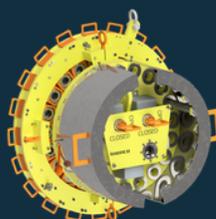

- Integrated skid for efficient subsea fluid sampling

ROV Panels & Load Display Systems

- Customizable interfaces for subsea equipment control

Diverless Blind Flange

- ROV-installable for faster, driverless deployment
- Hot stab connection for filling and pressure testing

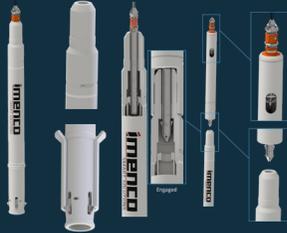

ROV MQC (Multi quick connection System)

- Allows multiple hydraulic lines to be connected or disconnected in one operation by an ROV

Subsea Guiding Products

Guideposts & Extensions

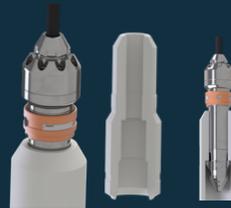

- ROV-friendly installation
- Customizable dimensions and strength

Lifting Anchors

- ROV or diver operable for safe subsea lifting operations

Post Tops & Anchor Receptacles

- Made for Imenco anchors and guidepost extensions

Guidewire Anchors

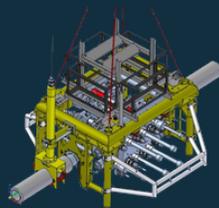

- Easily installed and released by ROV or diver

Other products and solutions

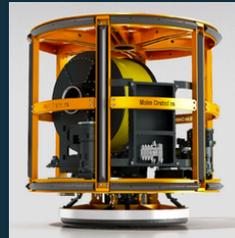

Clamps

Pipeline Repair System

Tether Management System

Diving Systems

Decompression Chamber

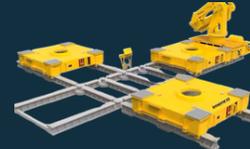

Mobile Diving LARS

Riser Spider

Skidding Systems

Hydraulic Motors

Cylinders

Riser Spider (for Production/Drilling)

Riser Centralizer

The Imenco Group

Imenco is a global technology partner delivering smart, engineered solutions to the subsea, offshore, energy, and renewables industries. With over 40 years of experience and operations spanning Europe and the Americas, we help customers operate safer, smarter, and more efficiently in the world's most demanding environments.
